PAST AWARD WINNERS

2017  Prevention & Wellness Trust Fund, Massachusetts Department of Public Health
2016  Support And Services at Home (SASH), Cathedral Square Corporation
2015  Student-Run Free Clinic Project Eldercare Program, University of California, San Diego
2014  Mobile Medicare Health Clinics, University of the Pacific
2013  Age-Friendly New York City, A Partnership between the Office of the Mayor, New York City Council, and New York Academy of Medicine
2012  Livable Community Initiative, City of Kingsport
2012  Healthy Steps in Silicon Valley, The Health Trust
2011  PEARLS, University of Washington, Health Promotion Research Center
2010  Area Geriatric Education Scholars Program for Upper Peninsula Youth (AGES), Upper Peninsula Health Education Corporation
2009  PREPARE: Disaster and Emergency Preparedness for Long-Term Care, Mater LifeWays Institute on Aging
2008  Guided Care: Improving Chronic Care for High Risk Seniors, Johns Hopkins University Bloomberg School of Public Health
2007  The Dancing Heart Program, Kairos Dance Theatre
2006  Brain Get Your Mind Moving, New England Cognitive Center
2005  Legacy Corps for Health and Independent Living, University of Maryland, Center on Aging
2004  Dignified Transportation for Seniors, Independent Transportation Network
2003  Alzheimer's Health Education Initiative, Alzheimer's Association
2002  Kinship Support Network, Edgewood Center for Children and Families
2001  Groceries to Go, Elder Services Network
2000  Experience Corps, Johns Hopkins Medical Institutions, Center on Aging and Health
2000  Assistive Equipment Demonstration Project, University of Massachusetts, Gerontology Institute
1999  Senior Wellness Project, Northshore Senior Center
1998  A Matter of Balance, Boston University, Royal Center for Enhancement of Late-Life Function

AWARD SELECTION COMMITTEE

Irena Pesis-Katz, PhD (Chair)
Associate Professor
Senior Director, PHM Informatics and Payment Innovation
University of Rochester Medical Center

Sato Ashida, PhD
Associate Professor
University of Iowa, College of Public Health

J Derek Cegelka, PhD, MPH, CHES
Assistant Professor
Department of Kinesiology and Health Science

Jeanne Elkins, PhD, DPT, MPH
Associate Professor
Brenau University

Connie Evashwick, ScD, FACHE
President
Consulting & Evaluation Associates

Yue Li, PhD
Professor
University of Rochester

Karon L. Phillips, PhD, MPH, CHES, CAPS
Adjunct Assistant Professor
University of Maryland Baltimore County

American Public Health Association

In 2016, staying true to its mission, the Jewish Home Family’s Parkinson’s Center (Parkinson’s Center) was established to provide care for those living with Parkinson’s disease and their caregivers. The Parkinson’s Center is a comprehensive program that offers a suite of services addressing individual and holistic needs. It is the first of its kind in the region and was created in response to the large number of people in the area with the disease. The Parkinson’s Center offers a broad approach and embraces four key elements: clinical excellence, education, support, and connection to research. For the provision of care for Parkinson’s residents and care for all Jewish Home Family sites, a Parkinson’s protocol was developed in collaboration with Gary Alweiss, MD, Chief of Neurology at Englewood Hospital (New Jersey), the Parkinson’s Center medical director, and Jewish Home Family staff. Central to the protocol is a regular interdisciplinary review of care with a neurologist, primary physician, and rehabilitation and nursing teams. Medical staff is comprised of community physicians from local hospitals who have practice privileges at the Parkinson’s Center. The Parkinson’s protocol includes: 1) assessment tools; 2) dietary recommendations; 3) medication management; 4) sleep awareness; 5) pain management; 6) fall prevention; 7) restorative exercises; 8) adaptive devices; and 9) social work interventions.

In addition, specialized rehabilitation activities have been developed and are provided by therapy staff. These include the: 1) BIG and LOUD therapy program to improve function and slow motor deterioration; 2) SPEAK OUT speech therapy program to enhance voice and volume; 3) Rock Steady Boxing classes to improve physical health, agility, and daily functioning; 4) diaphragmatic breathing; 5) strengthening exercises; 6) flexibility training; 7) balance and gait training; 8) cognitive therapy; and 9) a virtual rehabilitation platform designed to treat neuro-motor and/or orthopedic impairments. Other focused Parkinson’s specific activities include Pilates, music therapy, dance, meditation, and relaxation.

OUTCOMES
Forty residents participate in the Parkinson’s Center, and over 350 Parkinson’s residents participate in the Parkinson’s Center, and over 350 people have been retained to understand the disease, better identify individuals with Parkinson’s, and be exposed to and utilize specific tools and techniques that meet the needs of their residents. Twenty-five rehabilitation and recreation staff have been certified in BIG and LOUD, SPEAK OUT, Tai Chi for Parkinson’s, and the MOVE and SHOUT programs. Many of them have also become Rock Steady Boxing coaches. Rock Steady Boxing classes have quadrupled in volume to 55 participants since its inception; 85% of participants have either stayed the same or improved in most, or all, of their physical and cognitive indicators.

As a new program, education and training for Jewish Home Family staff, patients and their family members, and the entire community is essential to the success of the Parkinson’s Center, as is raising awareness around Parkinson’s disease and the resources the Parkinson’s Center offers. To date, the Parkinson’s Center has offered two symposia drawing national researchers, two community seminars, and monthly support groups for individuals with Parkinson’s and their caregivers. Collectively these educational and outreach opportunities have drawn nearly 400 attendees.

DISSEMINATION
In the last two years, the Parkinson’s Center has become the “go-to” program in the region for education, support, and resources for those affected by Parkinson’s disease. Through social media, e-blasts, and newsletters, the Parkinson’s Center has disseminated information regarding Parkinson’s disease. They have also connected individuals to research opportunities and to the Jewish Home Family through attendance at support groups and wellness programs.

DEDICATION

The Award for Excellence in Program Innovation was established by an endowment from Archstone Foundation, to the Aging & Public Health Section of the American Public Health Association, to recognize best practice models in gerontology and geriatrics. National programs that innovatively link academic theory with applied practice in the field of public health and aging are considered annually for this award. It is our hope that these model programs will be replicated and will continue to be evaluated in an effort to enhance services for older people throughout the United States.

To Irena Pesis-Katz, PhD, Chair of the Archstone Foundation Award Selection Committee, and the other members of the selection advisory committee, we extend our deep appreciation for their efforts in reviewing the nominations and selecting the outstanding program to receive this year’s award. To the winner of the 2018 Archstone Foundation Award for Excellence in Program Innovation, all the nominees, and to all who participated in the award process as applicants or reviewers, we offer our best wishes for continued success in their commitment to develop service models in the field of aging and public health.
