

# Strategic Plan Webinar

April 27, 2022

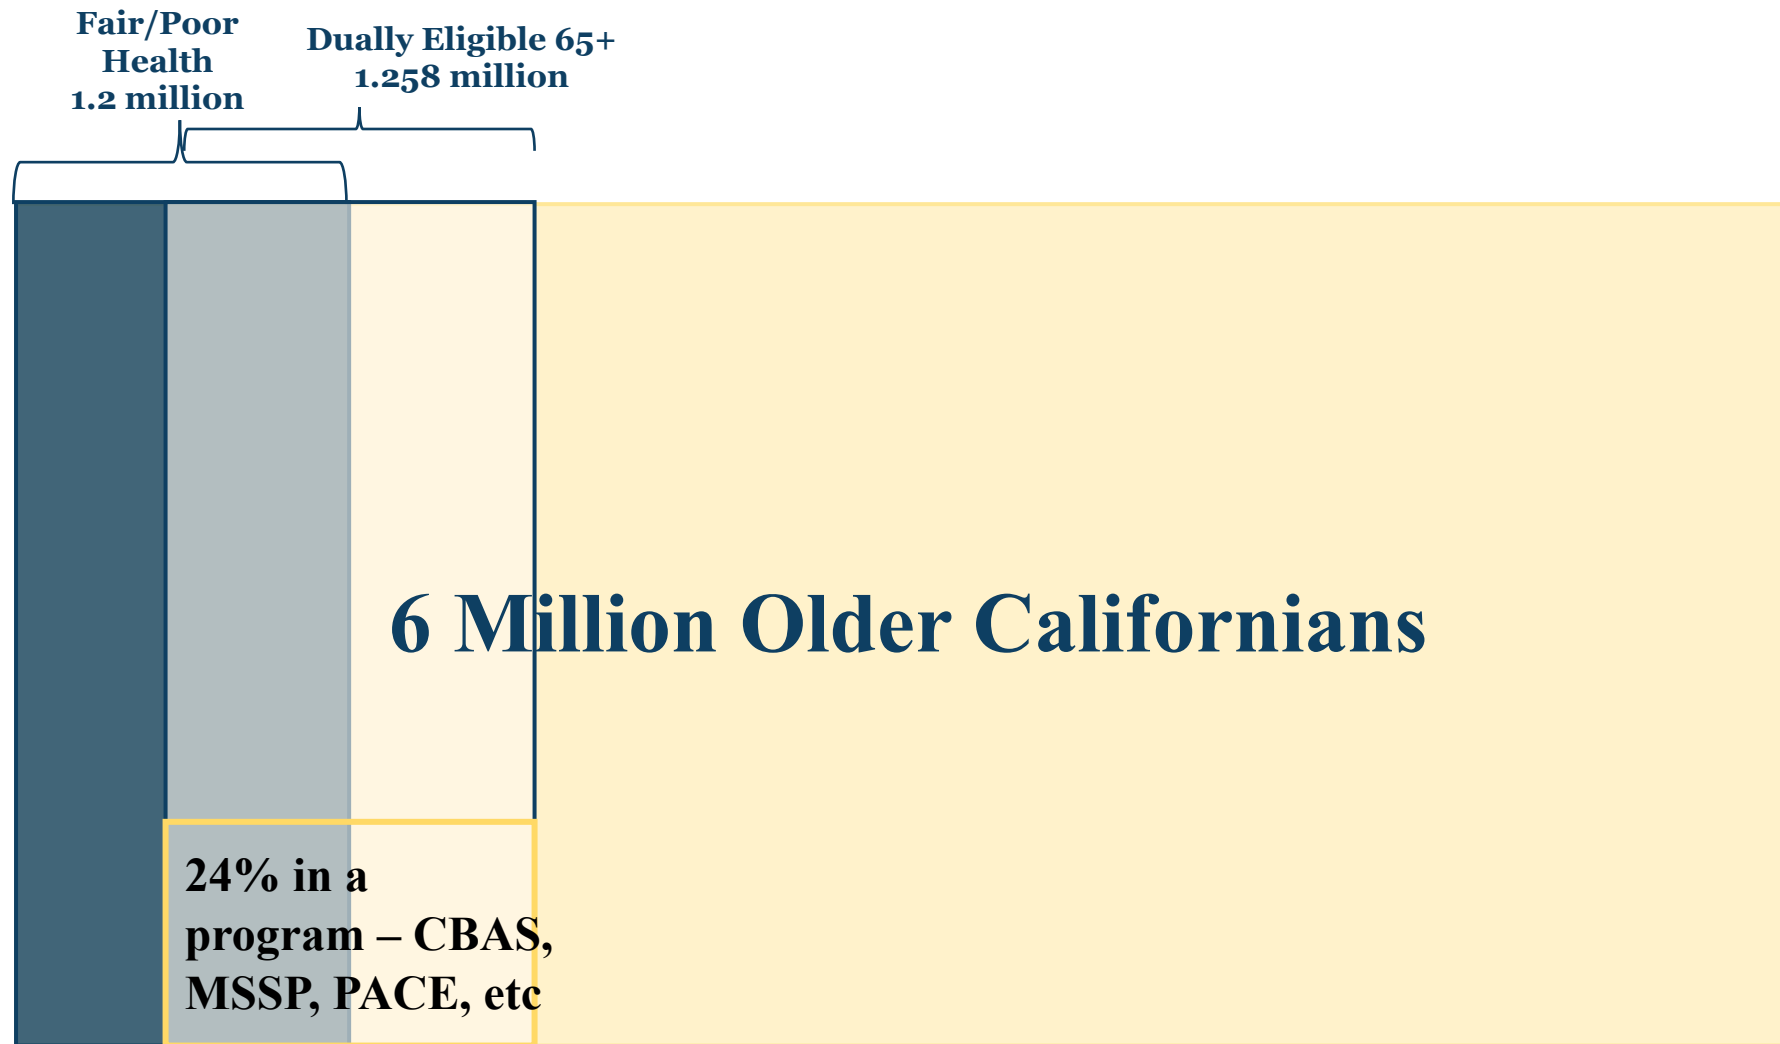

ARCHSTONE  
FOUNDATION

# Problem Statement – Older Adults

- ~23% Poor or Fair Health
- ~20% Have a Disability in Daily Living - 40% with Some Functional Impairment
- 80% Have 2 or More Chronic Illnesses
- Only 30% of Indicated Care is Provided for Geriatric Conditions (e.g., falls, incontinence, dementia)
- Outcomes vary by Race, Ethnicity, Wealth, Education, etc.
- Services are Siloed, Uncoordinated, and Difficult to Navigate
- Spending Priorities Favor High Tech/Cost Medical Interventions

# Older Adults in Fair or Poor Health

## NEW MISSION

Archstone Foundation is a grantmaking organization dedicated to improving the health and well-being of older Californians and their caregivers.

# NEW VISION

All older Californians have access to person-centered, coordinated, high-quality care from integrated, well-trained teams of health and social service partners who are culturally competent and compassionate.

# Archstone Foundation Legacy Funding Areas

- Fall Prevention
- Elder Abuse & Neglect
- End-of-Life and Spirituality in Palliative Care

# Archstone Foundation

## Immediately Prior Funding Priorities

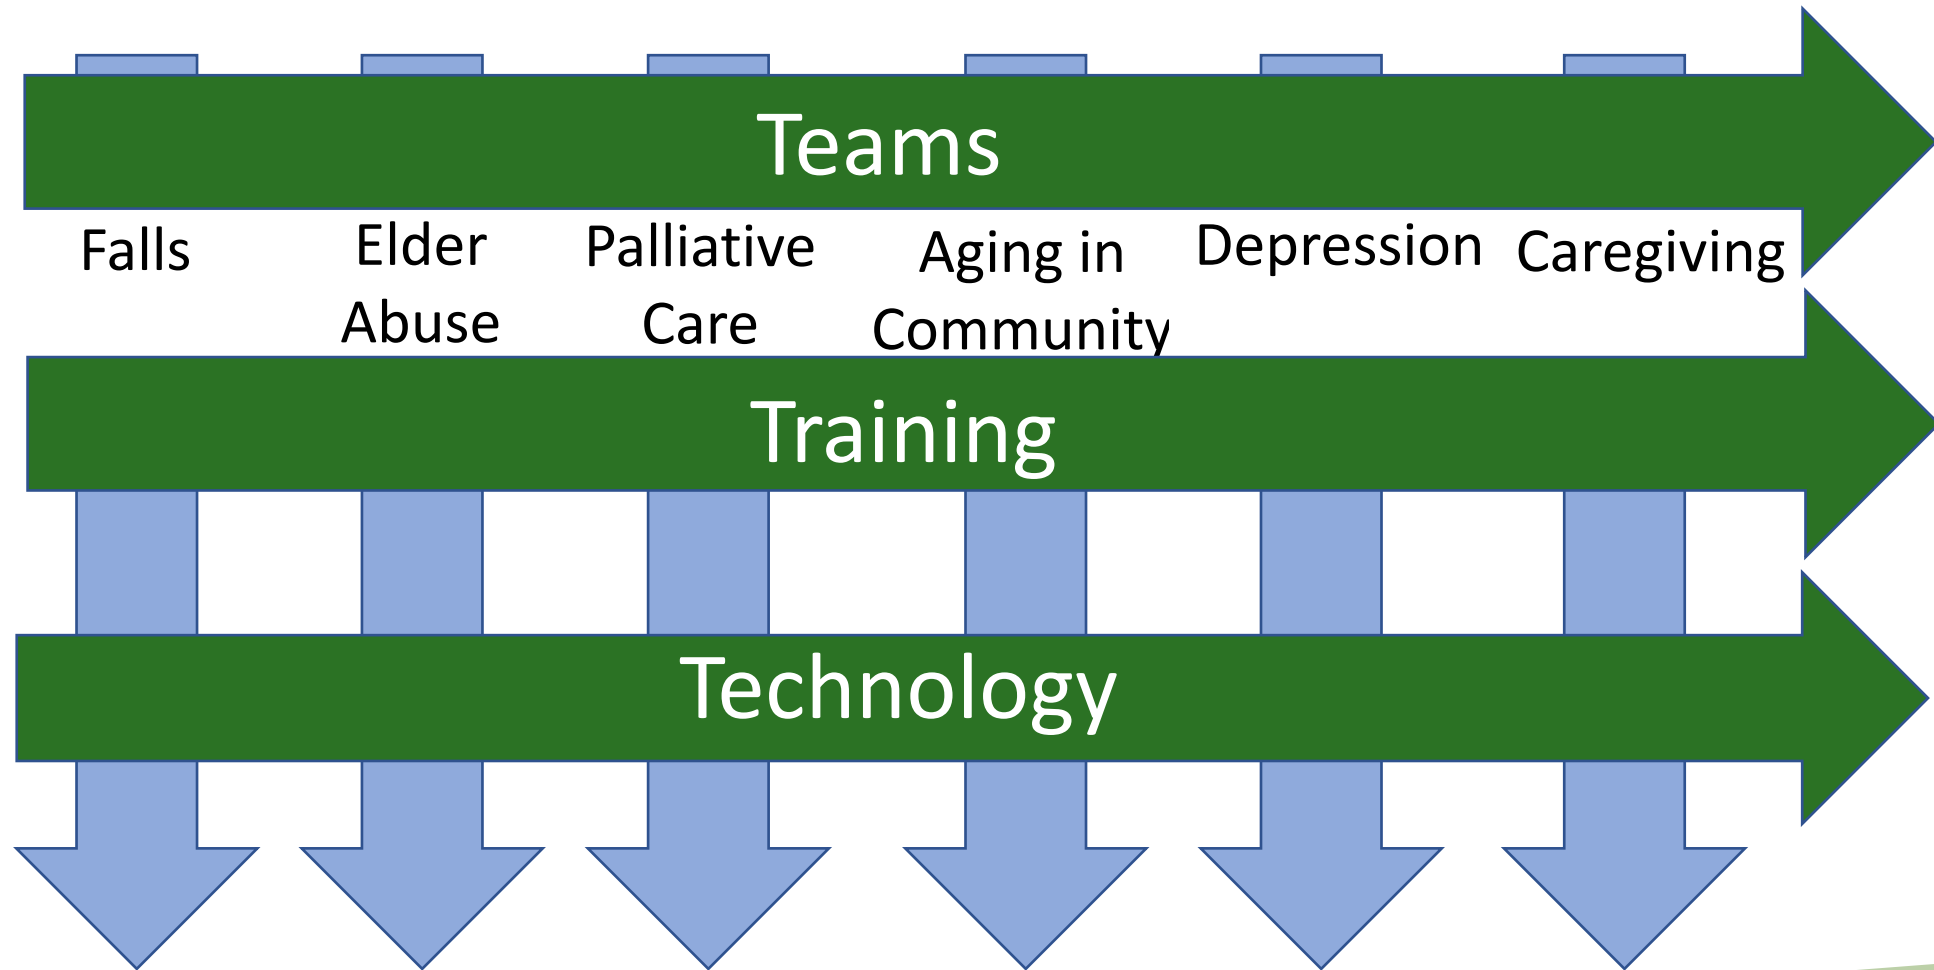

- Aging in Community
- Depression in Late-Life
- Family Caregiving

Culturally Competent

Client-Centered

Comprehensive

Collaborative

Correct

Connected

Compassionate

**GOALS**

**Teams**

**Training**

**Technology**

**Grants, Technical Assistance, Evaluation, Policy and Advocacy, Convenings, Communications, Leadership**

# TEAMS

Develop, test, and spread effective team models that improve outcomes for Older Adults and their families and fit with economic and regulatory incentives of payers and providers.

# TRAINING

Make available high-quality training to members of health care and social service teams in practice, with a focus on teamwork skills for all and meeting the needs of newer team members filling gaps in traditional care – i.e., care navigators, care coordinators, CHWs, etc.

# TECHNOLOGY

Push for the adoption of appropriate technologies that facilitate teamwork and empower older adults and their families to direct their care through developing specifications, advocating for better regulatory frameworks, and demonstrating benefits to stakeholders.
